DETAILED ACTION

Summary

On June 23, 2005, an Office Action was sent to the Applicant rejecting claims 1-31. On July 20, 2005, the Applicant responded with arguments.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wherry (2002/0038273) in view of Bove (2005/0154658).

Wherry discloses the invention substantially as claimed, as set forth in the previous Office Action; however, Wherry does not disclose specifics pertaining to the rebalancing transaction. Bove teaches a method and corresponding system for automatic portfolio rebalancing, including recommended rebalancing transactions (p.2, 24, 28; p.4, 40; and p.5, 59 to p.6, 64, 67-68—automatic portfolio rebalancing process).

Art Unit: 3624

It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate automatically rebalancing a user's portfolio based on user preferences, as taught by Bove into the invention disclosed by Wherry, to provide the user with a means to maximize gains in their portfolio.

Response to Arguments

Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.
